

ESKA Leaf

Recycled board made from recycled paper and fibres derived from actual fallen leaves.

Leaf-based. Premium. Distinctive.

A recycled solid board made from recycled paper and laminated with paper containing fibres derived from actual fallen leaves collected from urban streets.

Available with a white or deep brown surface, each base enhances the natural texture and subtle variations of the leaf fibres, creating a distinctive premium finish.

The combination of recycled paper and leaf fibres contributes to the board's rigidity and strength, delivering reliable performance across demanding packaging applications.

By giving fallen leaves a valuable new life instead of letting them become waste, Eska® Leaf and Eska® Dark Leaf transform an overlooked natural material into a premium packaging solution designed for multiple lives.
